

Atopic Dermatitis and Eczematous Disorders

It is estimated that around 15% of the population suffer from atopic dermatitis or eczematous disorders at some point in their lifetime, causing a significant percentage of visits to dermatologists, primary care physicians, and allergists. Despite much current research interest, the pathophysiology of these disorders and their optimum treatment remain uncertain. In *Atopic Dermatitis & Eczematous Disorders*, the authors discuss all clinical aspects and treatment of atopic dermatitis and other eczema variants, including: Seborrheic dermatitis, Nummular eczema, Stasis dermatitis, Exfoliative erythroderma, HIV-related dermatoses, Ichthyosis vulgaris, Hand dermatitis, Immunodeficiency disorders. The book also discusses complications such as secondary infection and ophthalmic disease, as well as legal aspects. It contains almost 300 high-quality color clinical images, making it an invaluable visual reference for dermatologists in practice and training, candidates for post-registration qualifications, primary care practitioners, medical students, and allergists.

LAWBOOK International Lawbook is an initiative of professionals with passion for a better society. It is dedicated to exposing, explaining and expounding law for the purpose of attaining Social Justice in the society. It is a platform where people meet, discuss, analyze and proffer solutions to common issues of mankind.
