

Diet, Demography, and Disease: Changing Perspectives on Anemia (Foundations of Human Behavior)

This volume serves to challenge the conventional views of the relationship between health, disease, and iron; of the symptomatic role of low iron levels; of cultural imperatives related to diet, such as daily meat intake; and of prescribed iron fortification. The contributors are leading researchers in ethnography, archaeology, physical anthropology, microbiology, and medicine.

LAWBOOK International Lawbook is an initiative of professionals with passion for a better society. It is dedicated to exposing, explaining and expounding law for the purpose of attaining Social Justice in the society. It is a platform where people meet, discuss, analyze and proffer solutions to common issues of mankind.
