

Laser Refractive Cataract Surgery: Science, Medicine, and Industry

The use of the femtosecond laser in cataract surgery adds a new level of precision and reproducibility to a procedure that has yielded good outcomes for many years. In Laser Refractive Cataract Surgery, Stephen Slade, MD, FACS, the first surgeon to perform the procedure in the United States, engages leading ophthalmologists, scientists, venture capitalists, laser manufacturers, and legal and regulatory experts in a broad discussion about laser refractive cataract surgery. In merging the science, medicine, and business perspectives, Laser Refractive Cataract Surgery presents a comprehensive overview of the procedure its current capabilities, future potential, possible complications, and more with the collective goal of improving the outcomes achieved in cataract surgery, and thus, improving patients results and lives.

LAWBOOK International Lawbook is an initiative of professionals with passion for a better society. It is dedicated to exposing, explaining and expounding law for the purpose of attaining Social Justice in the society. It is a platform where people meet, discuss, analyze and proffer solutions to common issues of mankind.
