

Corneal Transplants

To tackle a growing health literacy challenge and improve comprehension and recall, the American Academy of Ophthalmology has revamped its patient education content to meet best-in-class readability and information design standards. Whatever the condition or procedure, the Academy's enhanced materials offer vital information to improve patient understanding and drive positive health actions, saving ophthalmologists consultation time and strengthening their informed consent process. Give patients the tools to enjoy better eye health by providing information you can trust and they can understand. This brochure covers: corneal transplants; what causes cornea problems?; should you have a full or partial thickness corneal transplant?; what is Descemet stripping endothelial keratoplasty?; what problems may arise following corneal transplants?; does corneal transplant provide an opportunity for clear vision? New content adheres to latest health-literacy standards by featuring: shorter sentences and expanded use of bullets; emphasis on must know action steps directing patients toward healthier outcomes; a glossary for medical/technical terms; a new text font (APHont) specifically designed for readers with low vision. A new layout with a modern sensibility enhances readability and features the most important content at in the beginning and in a summary section at the end; shorter explanations with vital details highlighted in text boxes, pull quotes and sidebars; new medical art and images help to explain/illustrate the key message. Pack of 100 brochures.

LAWBOOK International Lawbook is an initiative of professionals with passion for a better society. It is dedicated to exposing, explaining and expounding law for the purpose of attaining Social Justice in the society. It is a platform where people meet, discuss, analyze and proffer solutions to common issues of mankind.
