

Drug Safety: Managing Innovation in Rheumatology, An Issue of Rheumatic Disease Clinics, 1e (The Clinics: Internal Medicine)

Edited by Drs. Jack Cush and Kathryn Dao, this issue of Rheumatic Disease Clinics of North America addresses one of the most significant issues facing the rheumatologist today: drug safety in a changing world where rheumatoid arthritis (RA) severity is less, patients are being identified and treated at a very early stage, and prevention is on the horizon. Topics covered include: communicating the risk of side effects, urate-lowering therapies, bisphosphonates, biologics, malignancy risks, and administering therapies to patients with co-morbidities.

LAWBOOK International Lawbook is an initiative of professionals with passion for a better society. It is dedicated to exposing, explaining and expounding law for the purpose of attaining Social Justice in the society. It is a platform where people meet, discuss, analyze and proffer solutions to common issues of mankind.
