

Insects, Hygiene and History (History: Bloomsbury Academic Collections)

Busvine's introductory account of the evolutionary histories of insects and mites leads on to a fascinating study of human reactions to ectoparasites. It shows how the extent of man's curiosity about them and references to their prevalence provide a continuous commentary both on the history of biological science from Aristotle to the present day and on the modes and manners of ages past. Subjects of ribald verse, quack medicine and morbid imagination as well as literary symbols of piety, love and human insignificance, this is also the history of how medicine discovered that ectoparasites acted as transmitters for epidemic diseases.

LAWBOOK International Lawbook is an initiative of professionals with passion for a better society. It is dedicated to exposing, explaining and expounding law for the purpose of attaining Social Justice in the society. It is a platform where people meet, discuss, analyze and proffer solutions to common issues of mankind.
