

Perioperative Medicine: Medical Consultation and Co-management (Hospital Medicine: Current Concepts)

Provides a comprehensive evidence-based guide to the management of the growing population of patients who require perioperative care. Perioperative Medicine: Medical Consultation and Co-Management is the first comprehensive reference text developed specifically for hospitalists but envisioned also to help internists, anesthesiologists, allied health professionals, fellows, residents, and medical students manage various aspects of the medical care of the surgical patient. The book features both the preoperative and postoperative medical management of the surgical patient. It focuses on systems, operations, quality of perioperative care, and preoperative assessment of the patient, all in consideration with system-specific risk and evidence-based strategies that minimize risk. It places special emphasis on care of the older hospitalized surgical patient and offers a thorough discussion of post-operative conditions and their management. Chapters cover vital topics such as: Hospitalist as a Medical Consultant Co-Management of the Surgical Patient Preoperative Evaluation Improving the Quality and Outcomes of Perioperative Care Developing, Implementing, and Operating a Preoperative Clinic Assessing and Managing Risk of Major Organ Systems Assessing and Managing Disorders for Surgery Postoperative Care and Co-Management by Surgery Type Managing Common Postoperative Conditions With the core responsibilities of perioperative care falling more and more on the shoulders of hospitalists, internists, and allied health professionals, Perioperative Medicine is a much-needed guide for managing the clinical and operational issues associated with caring for hospitalized surgical patients.

LAWBOOK International Lawbook is an initiative of professionals with passion for a better society. It is dedicated to exposing, explaining and expounding law for the purpose of attaining Social Justice in the society. It is a platform where people meet, discuss, analyze and proffer solutions to common issues of mankind. E-mail Address Password
