

Modern Management of Benign and Malignant Pancreatic Disease, An Issue of Gastroenterology Clinics, 1e (The Clinics: Internal Medicine)

Dr. Van Dam is an internationally recognized leader in gastroenterology and has been a leader in advances in interventional endoscopy. He brings this expertise to the topic of management of benign and malignant pancreatic disease and has selected top experts in the field to provide state-of-the-art clinical information to gastroenterologists. The modern management treatise of each article addresses current diagnostics as well as medical management. Seven articles are devoted to pancreatic cancer and span medical management, surgical management, radiologic imaging, endoscopic diagnosis, palliation, and screening. Other important topics addressed are pancreatic transplantation, pancreatic cystic neoplasms, acute and chronic pancreatitis, and autoimmune pancreatitis.

LAWBOOK International Lawbook is an initiative of professionals with passion for a better society. It is dedicated to exposing, explaining and expounding law for the purpose of attaining Social Justice in the society. It is a platform where people meet, discuss, analyze and proffer solutions to common issues of mankind.
